PM11-A

MS0305-RV-A

MS0404-V-B

FPC Precision Laser Depaneling Machine Series: MS0404-V-B

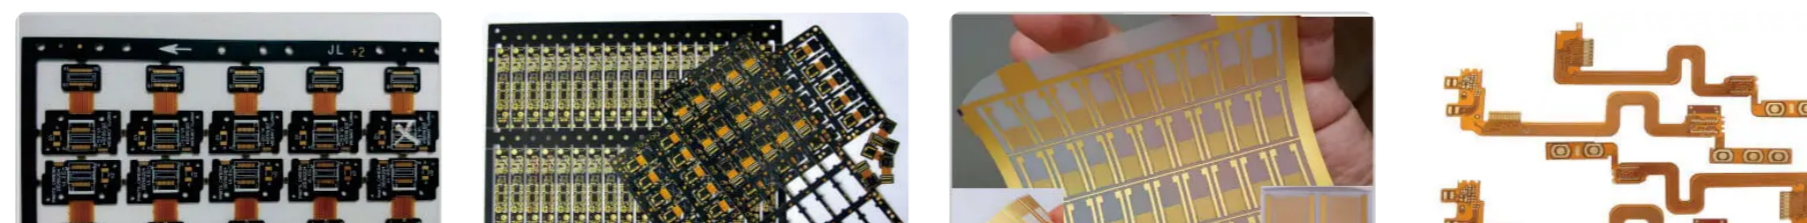

Introduction

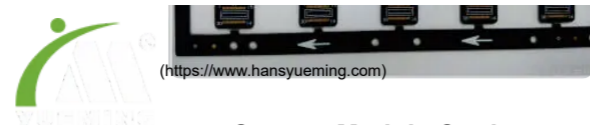

The precision laser cutting machine (laser depaneling machine) adopts non-contact processing, will not produce any mechanical deformation and can be processed arbitrarily complex graphics, shorten delivery time. High performance CCD enable auto-location, auto-correction and suitable for high precision processing, cutting thermal effect, improving the yield rate; cutting without burrs and black edges, no secondary processing, suitable for FPC reinforcement board, PCB rigid board, PI, LCP and other materials laser cutting film.

Language

PARAMETER

Modle	MS0404-V-B
Laser power(W)	UV Laser:10~20W Green laser:30W
Working area (mm)	400X400
Spot size	<20μm
Accuracy	±20μm
Dimension (mm)	1300 X 1100 X 1750
Weight(Kg)	1200
Supply voltage	AC220V±10% 50/60Hz
Working environment	Temp: 15~30°C, humidity: 5~85%, no condensation, no dust.
Gross Power (kw)	5.5

FEATURE

Professional laser cutting software for PCB industry, and easy for operation;The MES system customization and seamless docking of the production line can be realized;

Imported laser source and optic system to ensure machine long term stable performance;

CCD module helps to achieve auto-positioning cutting;

Optional with linear motor and marble platform to achieve high precision requirement;

Multiple platforms more functions, honeycomb adsorption platform is standard;

PCB board transmission track is optional, and prefect match SMT assembly line;

FPC,PCB processing platform and is optional for laser depaneling machine
