### Laser lift-off System

#### Mother glass type series

##### System description

- Laser lift off system for separating between glass & plastic film
- Essential process equipment for flexible display
- Enhanced monitoring tool for system stabilization
- Excellent performance in good homogeneity of longline beam
- High productivity with precision dual stage
- Optimized system design for customer

#### Cell type series

##### System description

- Laser lift off system for separating between glass & plastic film
- Essential process equipment for flexible display
- High throughput with multi-cell process
- Excellent performance in good homogeneity of long line beam
- Multi-motion control with high moving speed
- Optimized system design for internal process
