FUME EXTRACTOR (YC-IOTA STANDALONE)

Product Description

Our fume extractors are designed to ensure safe and clean operation of your laser processing. It removes harmful fumes and dust from the processing area and filters any odour that produces during the laser processing through its filtering system. Hence, providing a clean and safe environment for your business operation environment and the users.

Choosing the right fume extractor will optimize the engraving and cutting results and enhance long operating life for your laser systems. Depending on your requirement, currently we have 4 models for your selection:

- 1. YC-Iota (Standalone)
- 2. YC-Iota Pro (Standalone)
- 3. TC-Giga (Standalone)

SPECIFICATIONS

	YC-Iota (stand-alone)	YC-Iota Pro (stand-alone)	YC-Giga (stand-alone)
Air inlet interface	75mm	75mm	100mm
Input Voltage	AC110 - 220v	AC110 - 220v	AC110 - 220v
Maximum Power	100W / 200W	330W / 400W	350 W / 400 W
Filtering Efficiency	0.3um99.97%	0.3um99.97%	0.3um99.97%
Noise	<55db	< 65db / < 70db	< 70db / <65db
Systemic Flow	235 m3/h 300 m3/h	400 m3/h 550 m3/h	480 m3/h 550 m3/h
Dimension	425*250*410	400*300*360 400*300*560	550*415*920
Weight	17kg / 18kg	20kg / 28kg	42kg / 52.2kg
Number of element layer	3	4 / 7	1 / 7

Note: All information contained and provided herein is subject to change without prior notice. The features, images, performances, products specifications and data are indicative and approximate and may change without notice to improve reliability, function or design or otherwise.
