fuze go[®] AI

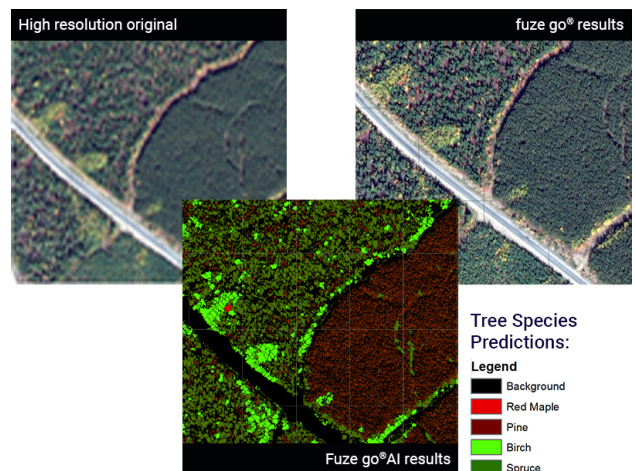

Fast, accurate data intelligence

If image analysis can be like trying to find a needle in a haystack, fuze go[®] AI is able to find that needle in minutes.

Every object has its own unique “spectral signature” – essentially its fingerprints. Using AI-powered analysis, fuze go[®] AI can detect objects based on their unique spectral signatures – providing vital information that minimizes risk, mitigates loss, and supports profitability.

fuze go[®] AI can work with images from any source, including satellites, drones, security cameras, and LiDAR images. The insights offered improve operations in forestry, utilities and security – all at a lower cost than competitors.
