Product Introduction

Product Description

Types of Laser Cleaning Applications

The conventional cleaning industry has an assortment of cleaning techniques, which are predominantly utilized concoction specialists and mechanical strategies for cleaning.

As China's ecological insurance laws and guidelines become more rigid and individuals' natural security and wellbeing mindfulness are expanding, the number of synthetic concoctions accessible in mechanical cleaning will diminish.

The difficulty we need to consider is How to search for cleaner and less intrusive methods of cleaning. What's more, laser cleaning is

most dependable and powerful arrangement.

Parameter of Handheld Laser Cleaner:

Model	JHC-FL-C60	JHC-FL-C100	JHC-FL-C200	JHC-FL-C500
Power	60W	100W	200W	500W
Gross weight (K G)	36	41	190	220
Cooling	Air Cooling		Air/Water Cooling	
Dimension	639x496x555mm		987x669x1193mm	
Cleaning length	1-100mm (Customized)			
Cleaning width	1-20mm (Customized)			

Laser Cleaning application:

Metal surface rust expulsion, Surfacepaint evacuation, and paint treatment, Surfaceoil, stains, earth cleaning, Surface coating, clear covering, Weldingsurface/splash surface pretreatment, Stonesurface residue and connection evacuation, Rubber shape buildup cleaning.

Features of Handheld Laser Cleaner

1. Intended for Continuous Performance Under High-Shock, Vibration, and Dust Conditions
2. Mechanized Single transport material taking care of framework
3. Effectively Reconfigured for Direct Installation into a Production Line Environment
4. Intended for Maintenance-Free Laser Surface Cleaning and Conditioning
5. Standard Wall Plug Operation with High Electrical Efficiency

Handheld Laser Cleaner Testing Videos

Metal surface rust expulsion, Surfacepaint evacuation, and paint treatment, Surfaceoil, stains, earth cleaning, Surface coating, clear covering, Weldingsurface/splash surface pretreatment, Stonesurface residue and connection evacuation, Rubber shape buildup cleaning.

Sino-Galvo Tech. designs develop and manufacture 2-axis and 3-axis scan heads, scanning systems, high power scanning heads, and controlling hardware and software. We can supply you with scanning solutions that support advanced industrial processes, electronics, and laser-based medical applications. If you are interested, please contact us directly for further communication. We will provide you the best products and services at the best price and performance.
