## hand held laser rust remover handheld laser cleaning machine

- Without using any chemicals and cleaning liquid, the waste is basically solid powder, small volume, easy to store and recyclable
- The laser is transmitted through the optical fiber, which facilitates long-distance operation and can clean the parts that are not easily reached by traditional methods. This can be used in some dangerous places to ensure the safety of personnel
- Laser cleaning can remove various types of contaminants on the surface of various materials, achieving a degree of cleanliness that cannot be achieved by conventional cleaning. And can also selectively clean the surface of the material without damaging the surface of the material
