Handheld Laser Welding Machine - Hertz

The handheld laser welding system combines the fundamental qualities of an ultra-portable device with uncompromising performance. With our new design, the product's overall volume has been reduced dramatically. This results in an extremely productive and powerful system. This device is a perfect integration of SLTL Group's Laser Welding Technology and reliable portable structure. The System is a fit for complex components as well as large and small components.

Hertz- Portable Handheld Laser Weldi...
