HandHeld Fiber Laser Welding Machine

Technical Details	
Laser Type	Fiber Laser (CW)
Power Range	1 KW /1.5 KW/ 2 KW
Electrical Supply	7 KVA / 10 KVA and 15 KVA
Welding Head Type	HandHeld with Wobbling
Weight	200 Kg
Size	1000mm X 900 mm X 900 mm
Fiber Length	10 meters

Features :

1. Portable
2. Easy to weld with clean welds
3. Fast and Accurate
4. Low cost of ownership
5. Homogenous fusion of material

Warranty 2 years on Laser Source

DESCRIPTION

REVIEWS (0)

DESCRIPTION

Easy Operation The laser welding machine has one big advantage that it is very simple operation, fast welding speed and no consumables. Welding in thin stainless steel plate, iron plate, aluminum plate and other metal materials can perfectly replace the traditional argon arc welding and electric welding technology. Hand-held swing welding mode, light and flexible. Interactive control system; ;makes the light spot larger, the welding seam better formed. Lighter weight, ;ergonomic design can be equipped with a variety of angle nozzles to meet the welding needs of different products. 360 Degree Welding After the laser beam is focused, a small spot can be obtained, which can be accurately positioned and used in the group welding of micro and small size for mass production. Mainly for the welding of thin-
