Video

Watch video below to learn more details.

Simple Use

Simple operation, small size, skill training (operation, maintenance, etc.) can be

- ✓ completed within 1 day, which solves the problem of recruiting technical welders and saves your labor cost.

Technical Specifications

If you want to know more detailed parameters, please contact us.

Show entries

Search:

Optical characteristics	Spec.	Note
Rated output power (W)	1000-2000	
Working mode	Continuous / modulation	
Output spot	Rotary motor ring variable multi spot	
Power regulation range (%)	10~100	
Control wavelength (nm)	1080	Rated output power

Optical characteristics	Spec.	Note
Output power instability	<3%	Rated output power; Continuous operation time: ≥5hrs; Working temperature: 25 °C.
Modulation frequency (Hz)	50~5k	Rated output power
Red light indicates output power (mW)	0.5~1	
QBH Optical output characteristics of output head		
Beam quality	<2	Rated output power
