

MLA-W-P200

High Power YAG 200W Portable Laser Welding Machine

FEATURES

- No need to be painted , not easy to be welded through;
- Specially suitable for welding 9999 gold sheet;
- 24 hours continuously working;
- More Higher Definition CCD and high Depth of focus filed;
- High power up to 200W;
- Built-in air-cooled, double-cycle cooling system;
- Multi-language control system;

TECHNICAL PARAMETERS

Laser Source ND: YAG
Wavelength: 1064nm
Max power: 230W
Frequency: 0.1-30HZ
Pulse width: 0.1-20ms
Beam diameter adjustment range: 0.3-2mm
Energy: 60-90mj
Positioning: CCD & microscope(Optional)
CCD display:
A. TFT high definition CCD, 8inch
B. One piece molding Aluminum Alloy case
C. Industrial touch screen
D. Control and monitor integrated
Positioning accuracy: +/-0.02mm
Up and down travelling route: 100-150mm
Power supply: 220V/50Hz/30A
Machine size: 650*380*380mm
