

The RPK Series of fiber-coupled diode lasers utilize single emitter laser diodes with either a single laser diode or multiple laser diodes to increase the output power. Single emitter devices require a lower current than laser diode bar products, making them a cost-effective, reliable, time-tested, and easier to use solution for your application. These high-power and high brightness diode lasers are available in wavelengths from 405nm thru 1550nm with up to 300W output powers. They are available in various package types with options including aiming beam, photo-detector, TEC, fiber detector, and thermistor.

Features

| Low cost and maintenance-free | There are two modes of continuous and modulated pulse to optimize processing quality |
|-------------------------------|--|
| Excellent power stability | Good beam quality, suitable for precision processing |
| Excellent system stability | High electro-optical conversion efficiency |
| Simple control interface | Maximum modulation frequency up to 5kHz |

| Applications |
|----------------------------|
| Additive manufacturing |
| Surface heat treatment |
| Welding |
| Lithium battery processing |

Product technical indicators

Optical characteristics

| Specifications | RBDL-CW500-E300 | RBDL-CW1000-E400 |
|----------------------------|-----------------|------------------|
| Optical Power | 500W | 1000W |
| Wavelength | 450±15 nm | |
| Output fiber core diameter | 330µm /400µm | 400µm/600µm |

| Cable Length | 10m or Customized |
|---------------------------------------|-------------------------|
| Beam Delivery | QBH or Customized |
| Guide Beam | Red |
| Operation Mode | Continuous or Modulated |
| | |
| Polarization | Random |
| Polarization Power Stability(25°C) | Random <3%(2h) |
| | |

Mechanical size and weight

| Weight | <80kg |
|-----------------|---------------|
| Outline Feature | 420*590*900mm |

Electrical characteristics

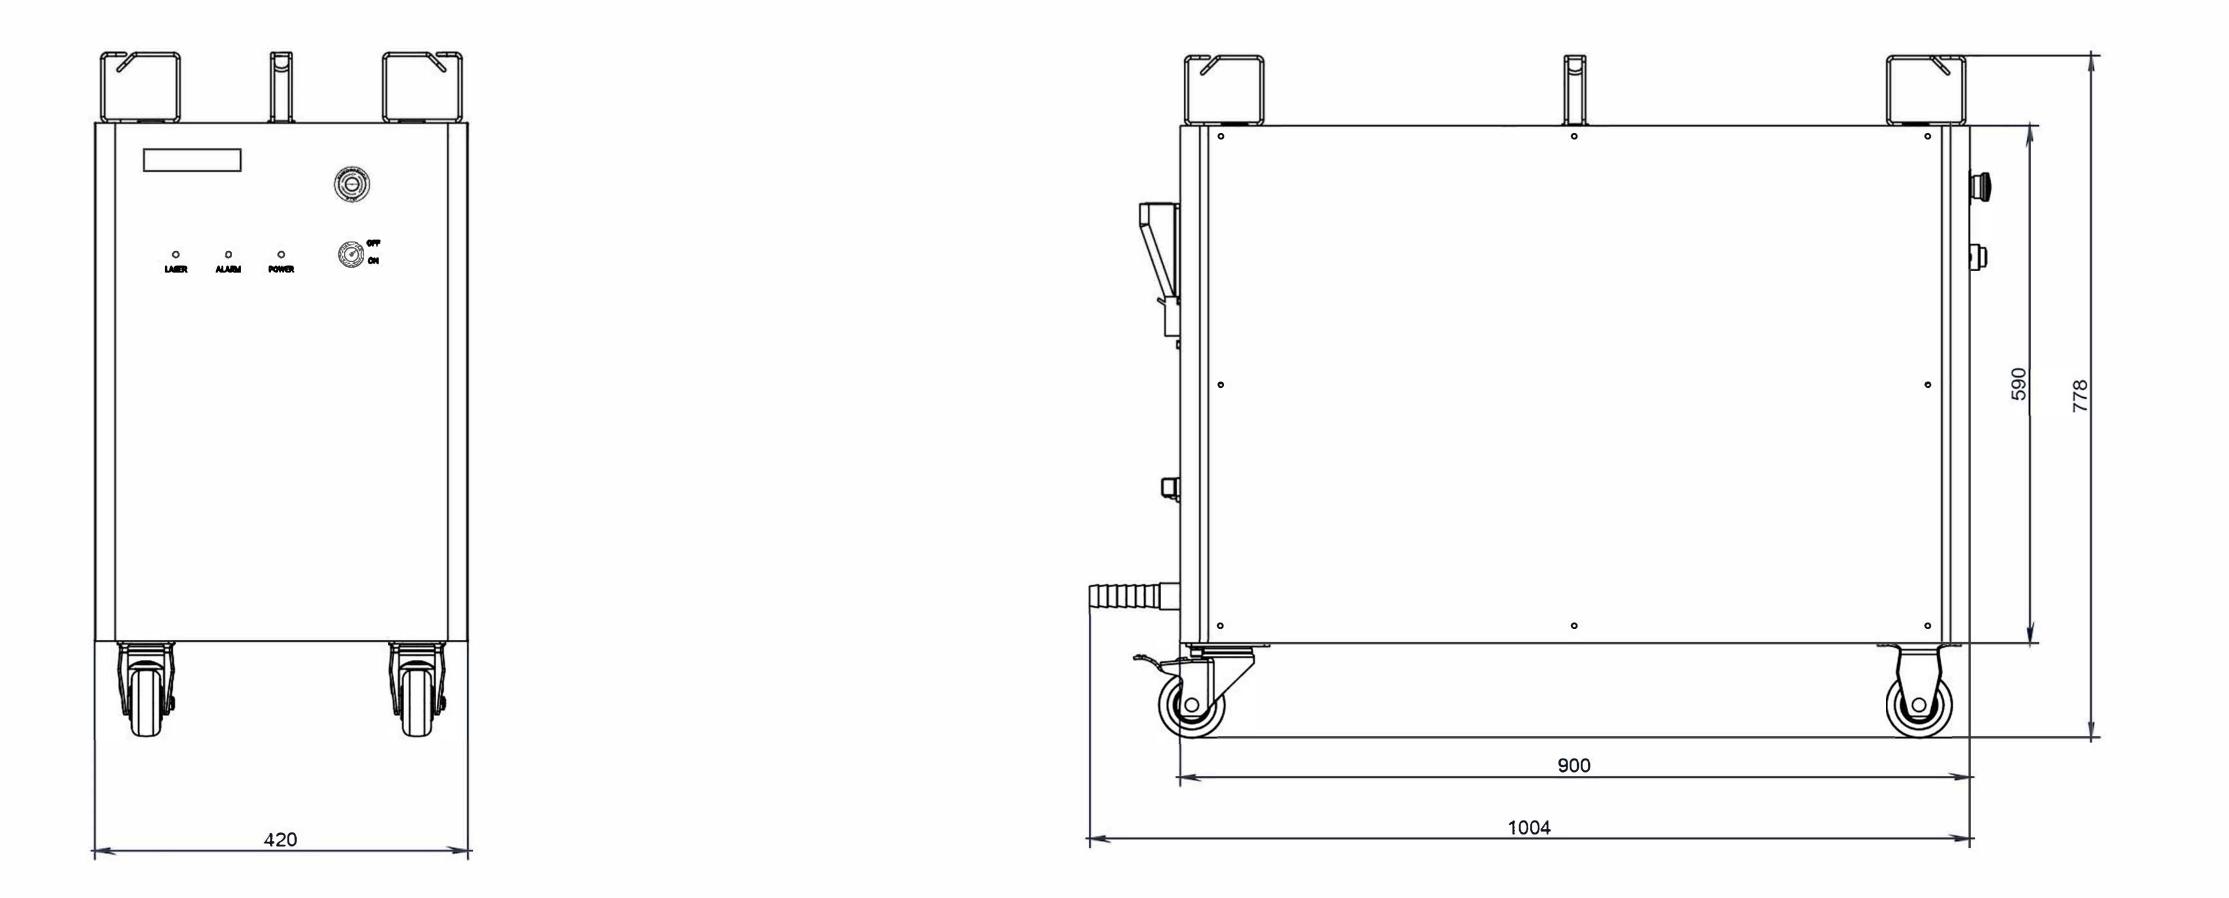

| Voltage | three Phase, 380±20V, AC, PE, 50/60Hz | |
|-------------------|---------------------------------------|-------|
| Power Consumption | 2.5 kW | 5.0kW |
| Control Interface | RS232 | |

Water cooling parameters

| Mini. Water Cooling Capacity | 2.0kW | 4.0kW | |
|------------------------------|--------------------------------|----------|--|
| Temperature Settings | 25°C(Laser Module), 30°C(QBH) | | |
| Cooling Tubes Size(Inner) | 19mm | | |
| Cooling Water Flux | >15L/min | >25L/min | |
| QBH Cooling Water Flux | 2.0L/min | | |

External dimensions

Note: The return light will affect the performance and life of the direct semiconductor laser, and it needs to be used under the condition that the output laser is deviated from the vertical direction of the worktable by 8°-10°.
