

## MLA-W-C200

### High Power YAG 200W Laser Welding Machine

### FEATURES

- Integrated modulation, easy for maintenance and operation;
- Pure gold and silver could repeat welding without painting;
- 24 hours continuously working;
- More Higher Definition CCD and high Depth of focus filed;
- High power up to 230W;
- Built-in air-cooled, double-cycle cooling system;
- Multi-language control system;
- Newly exclusive patent laser cavity and optical circuit;

### TECHNICAL PARAMETERS

Laser Source ND: YAG  
Wavelength: 1064nm  
Max power: 230W  
Frequency: 0.1-30HZ  
Pulse width: 0.1-20ms  
Beam diameter adjustment range: 0.3-2mm  
Energy: 60-90mj  
Positioning: CCD & microscope (Optional)  
CCD display:  
A. TFT high definition CCD, 8inch  
B. One piece molding Aluminum Alloy case  
C. Industrial touch screen  
D. Control and monitor integrated  
Positioning accuracy: +/-0.02mm  
Up and down travelling route: 100-150mm  
Power supply: 220V/50Hz/30A
