| Product application

Widely used in tiny parts of precision machining, rings, pendants, bracelets, dentures, and cell phone charger interface, hardware, clock,

sports, golf, medical devices. Titanium alloy ornaments, frames, especially for gold and silver jewelry fill the holes, weld lines, embedded

parts welding.

| Product advantages

★With 24 hours of continuous operation, stable performance of the whole machine,

electric adjustable beam expander

★The user-friendly design, in line with ergonomic, working long hours without fatigue.

★10X microscope system based on pioneered the use of high definition CCD observation system to

ensure spot effect in appearance.

★Use 7-inch LED screen, able to switch in Chinese and English freely, pace with the international market.

Model	3HE-SS200W
laser power	200W
laser wavelength	1064nm
max pulse energy	90J
Laser types	Nd:YAG
Laser welding depth	0.1-3.0mm
Pulse width	0.1-20ms
Combo laser welding frequency	0-50Hz
Spot adjustment range	0.2-3mm
Machine power consumption	≤6KW
Electrical requirement	AC220V±10%/50Hz 30A
Cooling method	Water cooling
Observing systems	10X microscope or high definition CCD
Protective gas	Argon
Host system size	1220X1000X600mm

PREV: Jewelry laser spot welding machine

NEXT: 600W Automatic laser welding machine
