Inquiry

Jewelry Laser Welder is suitable for jewellery laser welding industry, it adopts ergonomic design, equipped with special microscope observation system and high-speed electronic filter device that can protect operators' eyes. The high power beam expanding system can obtain more fine light spots and meet the needs of fine laser spot welding. The machine operation process is easy. It has the advantages of good welding effect, stable and reliable equipment, low failure rate.

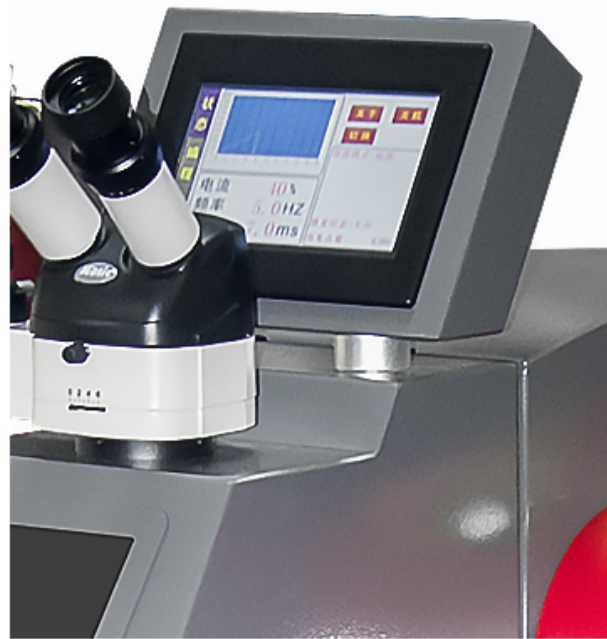

Control Systems

The touchscreen is used to input programs and displays data such as power, pulse duration and pulse repetition frequency during operation. Pulsing is triggered via a footswitch

LCD Touching Control Panel

Touch-screen parameters panel, easy to use and operate

HD Microscope

Built-in protective grating, long-term welding will not hurt the eyes. The details are clear, and fine welding of special positions can be realized.

Water Chiller

Built-in chiller saves space. Good heat dissipation, high stable performance, can protect the normal operation of the machine, extend the working time.
