Steel Plate CNC Plasma Cutting And Drilling Machine 150-3000rpm

Large Image : Steel Plate CNC Plasma Cutting And Drilling Machine 150-3000rpm

Product Details:

Place of Origin:	China
Brand Name:	KAWE
Certification:	ISO9001
Model Number:	KS/ZK-4000D

Payment & Shipping Terms:

Minimum Order Quantity:	1 set
Price:	USD 15,000-30,000
Packaging Details:	export standard package
Delivery Time:	30days
Supply Ability:	1set /30days

Steel Plate CNC Plasma Cutting And Drilling Machine 150-3000rpm

Description

Cutting Speed:	100-3000mm/min	Product Name:	Cnc Cutting And Drilling Machine
Control System:	Fangling FL-7600KW	Dimension(l*w*h):	Customized
Plasma Power:	Hypertherm Maxpro200	Motors:	Panasonic
Gears:	Germany Neugart	Software:	FLCAM
Drilling Dia.:	5-32mm	Material:	Steel/Aluminum/stainless Steel
Drilling Speed:	150-3000 Rpm	Spindle Power:	5kw

CNC Plasma Cutting And Drilling Machine 150rpm,

CNC Plasma Cutting And Drilling Machine 3000rpm, cnc plasma cutter and table 5kw

Multi Function CNC PLASMA CUTTING And Drilling MACHINE For Steel Plate

Summarize

CNC drilling&cutting machine is a kind of compound processing machine with high efficiency, high precision, high reliability machine, combining the technology of CNC drilling machine and CNC cutting machine. The main feature of numerical control is that the cutting machine can process according to the drawing, substitute the trivial, inefficient artificial calculation for computer programming and accurately cut various complicated shapes. When workpiece do not need drilling, this machine can process cutting steel accurately like other cutting machine, when workpiece needs drilling and tapping,this machine can drill and tap at first, and then process cutting, it realizes one machine services serval processes, greatly improves the cutting efficiency.

CNC drilling&cutting machine is new automatic equipments that can do high-precision steel heat cutting for steel industry, shipbuilding, large machine, chemical equipment, boiler fabrication, and automobile etc.

Main technical parameters

Rail Span	4000mm
Rail length	12000mm
Machinable workpiece width	2500mm
Machinable workpiece length	9500mm
Machinable workpiece thickness	3-32mm
Transverse motor power	750w
Main shaft longitudinal stroke	9500mm
Longitudinal motor power	2*2kw
Drive way	double-way drive
Drive system	Japan Panasonic all digital AC servo drive and driver
Fast moving speed	12000 mm/min
CNC system	FL-7600KW
Drilling Shaft	1 Group
Taper Hole of Spindle	BT40
Main shaft drilling speed	150-3000rpm
Main shaft motor power	5kw
Main shaft lifting stroke	400mm
Lifting motor power	2kw
Drilling thickness	6-50mm
Drilling Diameter	5-32mm
Iron plate dogging device	2sets
Spray cooling unit	1set
Plasma cutting speed	1000-3000 mm/min
Plasma cutting thickness	6-32mm
Effective lifting distance of plasma cutting torch	150mm

FAQ

1. Are you factory or foreign trade company?

We are factory ,do both domestic and froeign market

2. What shall we do if don't know how to operate your machine after bought from you?

We have detailed installation and operating instructions attached, also comes with video, it is very simple. We have telephone and email support at 24 hours a day. If you need our engineer go to your factory installation and training , that all no problems

3. What's the quality of your products?

For the machine frame all made by ourself, quality and delivery time have enough guarantee . Also our products passed CE certification, exported to lots countries around the world, such as Russia, Iraq, Belgium, Kazakhstan, Korea, etc. You can rest assured with the quality absolutely.
