

## Large format laser cleaning machine with GOLD MARK cleaning system

Equipment structure design is reasonable, cleaning without grinding, non-contact, no heat effect, cleaning process on the surrounding environment, no damage to the health of workers, large cleaning area, high efficiency, low cleaning costs, double red light positioning and the distance between the cleaning surface can be precisely controlled, cleaning uniformity, good results.

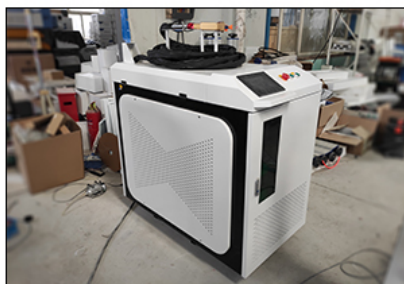

# Dual red light Laser cleaning machine

2022 NEW MODEL

## New Upgrade Laser Cleaner

Newly upgraded double red light control system, focus adjustment is easier and faster. The overall structure of the machine is compact, the overall weight is light, double red light focus, can quickly find the focus of the laser beam, flexible operation through the grip, you can carry out any angle of the work, the operation is more simple. Large cleaning area, high efficiency, low cleaning costs, and the distance between the cleaning surface can be precisely controlled, cleaning uniformity, good results.

## Product Advantages

- 
- (1) High power fiber laser cleaning machine
  - (2) Non-contact cleaning, no damage to the workpiece
  - (3) Double red light precise positioning, can be a large surface cleaning of the workpiece
  - (4) No consumables, no chemical pollution, energy saving and power saving
  - (5) easy to operate, can carry or equipped with robots for automatic cleaning
  - (6) High cleaning efficiency, saving time
  - (7) stable laser cleaning system, maintenance-free

**Cleaning Gun**

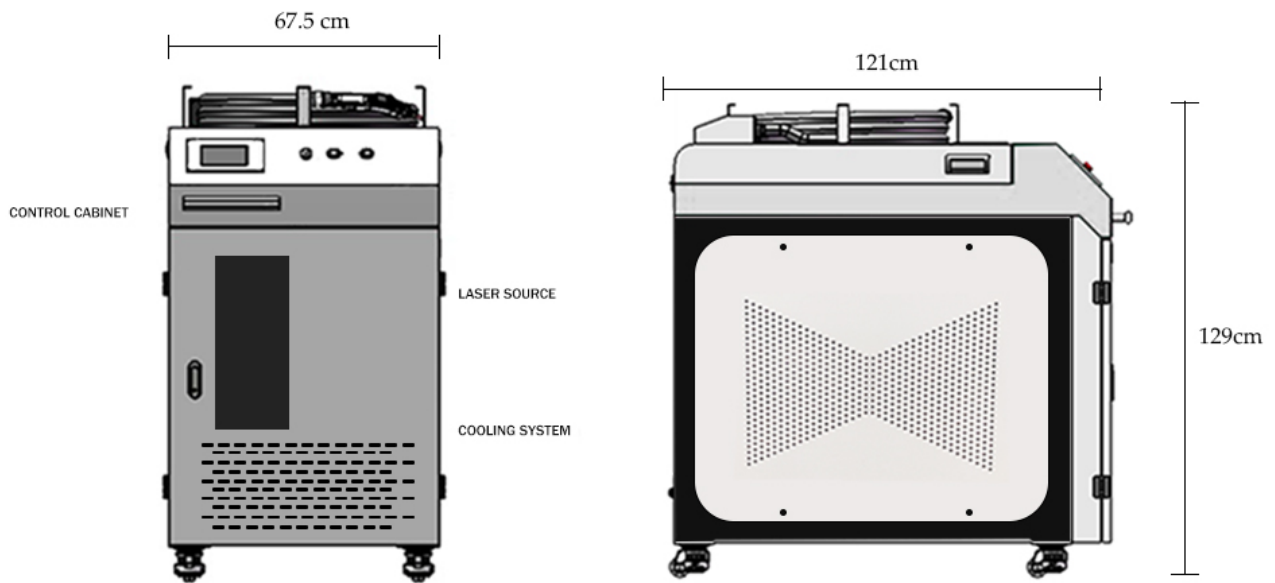

**Laser source**

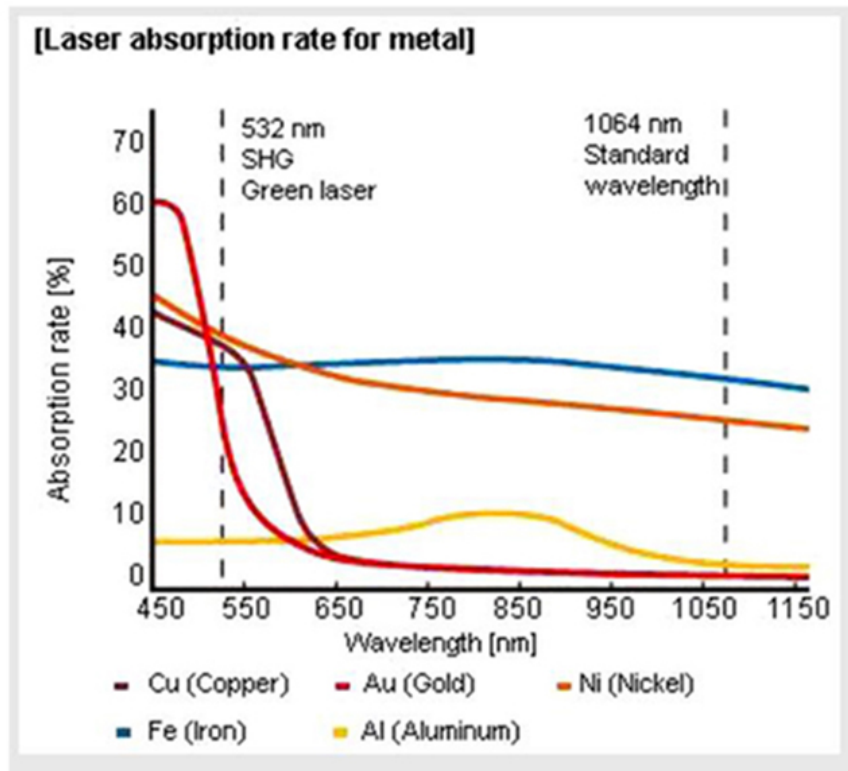

**Water chiller**

## Product Advantages

No	Item	Data
1	Laser Power	1000w 1500w 2000w
2	Fiber wire length	10 Meters
3	Laser source brand	Raycus/JPT
4	Cooling method	Water cooling
5	Cleaning width	0-10cm
6	Swing frequency	150KHZ
7	Air system	air compressor
8	Cleaning head weight	1.2kgs

## Applications

Pre-treatment before welding

Post-weld treatment

Oxidation removal

Artifact Restoration

Rust Removal

Oil and grease removal

Paint Stripping

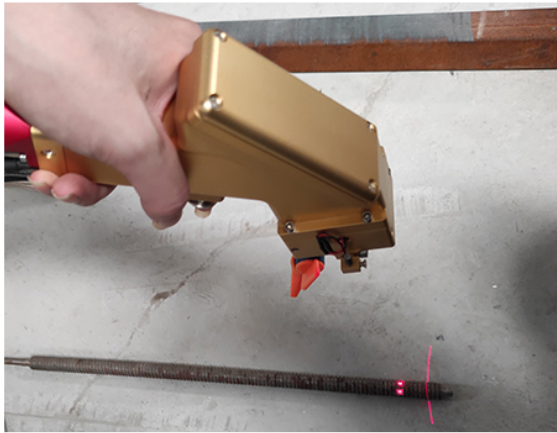

Pre-treatment of parts  
before coating

## Core Components

## Handheld Cleaning Gun

Handheld cleaning gun design, double red light positioning, large format design, can flexibly respond to a variety of objects and angles

## High Power Continuous Lasers

Adopt JPT high power continuous laser, high sustainability and long service life.

## Industrial water chiller

Adopting the industry's advanced water chiller, supplemented by temperature control system, with double guarantee.

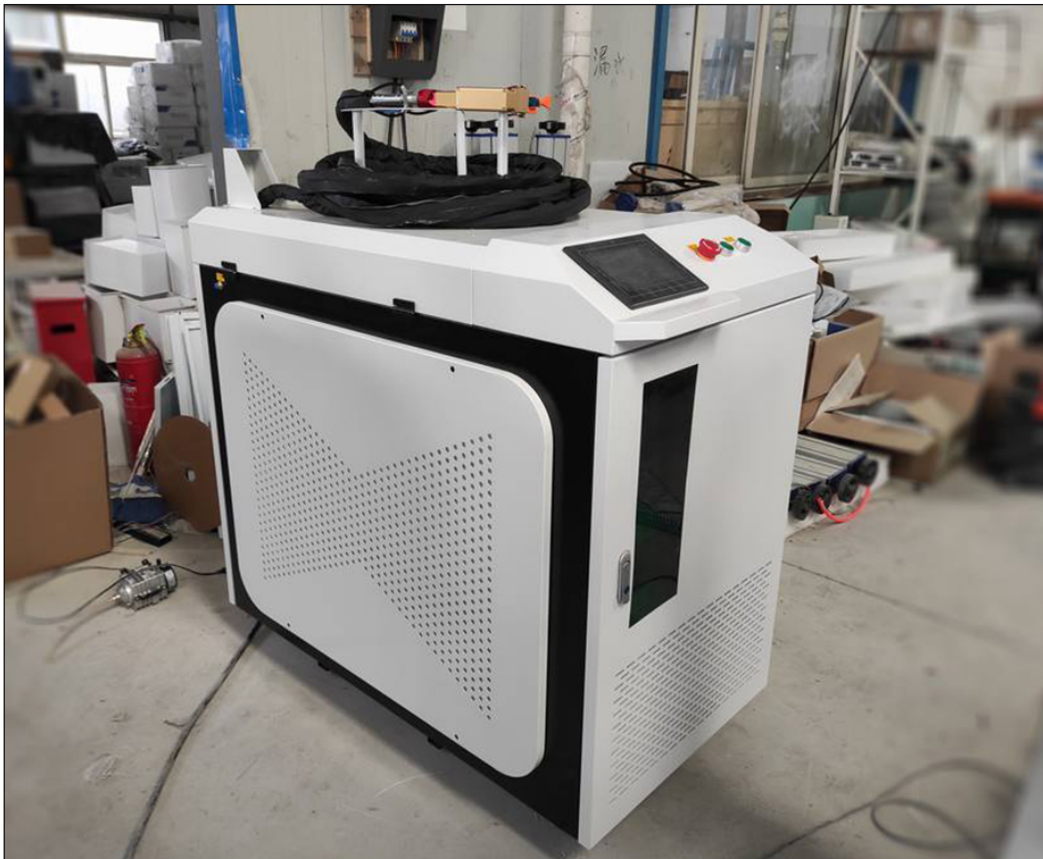

## Powerful laser cleaning system

Easy to operate, can be focused by optical system, support 14 languages

This is not the first time I buy machines from this plant. Good build quality and components. You can change the configuration at your discretion! I recommend.

 0

Many times to buy quality trustworthy

 Philippines

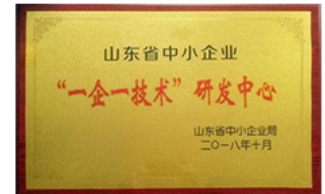

22 Aug 2020

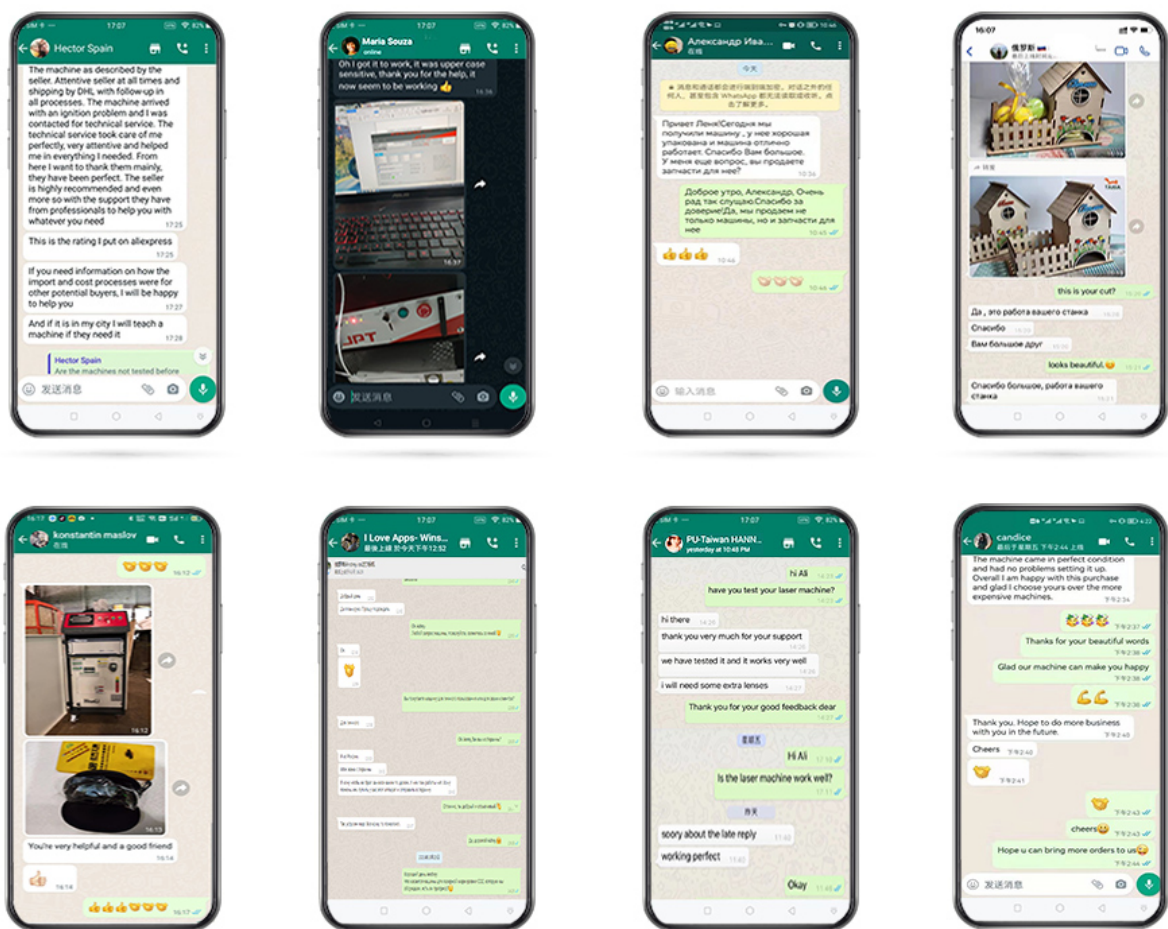

The machine is efficient and fast. I only use 7% - 10% power for most of the wood engraving, 30% for glass etching. Haven't tried it yet on colored metal and other materials. So far, this exceeds my expectations. Will buy a bigger one in the next few months. Customer support is excellent too. Video conference and remote assistance is what makes them a great supplier for clients in abroad like me.

 0

Very satisfied with the use of the results
