

LM-D

SISMA / LASER SYSTEMS

LM-D, manual laser welding system.

Stable

LM-D incorporates the Smart Spot technology for a repeatable welding process ensuring a wide depth of field and a stable laser firing already from the first pulses.

Comfortable

The new ergonomic design and low noise level ensure total operator comfort. The ECO function deactivates specific system components during periods of inactivity thereby ensuring reduced consumption.

Connected

LM-D features USB and Ethernet connectivity for welding recipes download/upload and software and firmware update. The LM-D machine can also be controlled remotely via smartphone, tablet or computer.
