Manx R Series

WORLD'S FASTEST InGaAs LINE-SCAN CAMERA

KEY FEATURES

WORLD'S FASTEST SWIR LINE-SCAN IMAGING UP TO 256 kHz

HIGH RESOLUTION

LOW NOISE, LOW DARK CURRENT

Based on an in-house developed InGaAs linear detector, the Manx rectangular (R) is a high-performance short-wave infrared (SWIR) camera providing high speed and quality line-scan imaging. At unprecedented line rates of up to 256 kHz (or 128 kHz), the Manx R stands as the fastest line-scan InGaAs camera available in the world.

It presents the lowest noise performance record for a 2048 pixel SWIR linear camera, combined with excellent dynamic range. The use of CoaXPress interfacing enables fast and reliable data transfer. The Manx R products are suitable for spectroscopy and spectral-domain optical coherence tomography (OCT).

WORLD'S FASTEST InGaAs LINE-SCAN CAMERA

KEY FEATURES

**WORLD'S FASTEST SWIR LINE-
SCAN IMAGING UP TO 256 kHz**

HIGH RESOLUTION

LOW NOISE, LOW DARK CURRENT

Based on an in-house developed InGaAs linear detector, the Manx square (SQ) is a high-performance short-wave infrared (SWIR) camera providing high speed and quality line-scan imaging. At unprecedented line rates of up to 256 kHz (or 128 kHz), the Manx square (SQ) stands as the fastest line-scan InGaAs camera available in the world.

It presents the lowest noise performance record for a 2048 pixel SWIR linear camera, combined with excellent dynamic range. The use of CoaXPRESS interfacing enables fast and reliable data transfer. The cameras have standard on-board image correction featuring non-uniformity correction (NUC), bad pixel replacement (BPR) and gain control.
