Optical Window In Optical Fiber

Optical windows are typically fabricated from two flat (or plano) polished surfaces that are optically transparent and intended to separate, seal, or otherwise protect other components.

[Send Inquiry](#)

Product Details

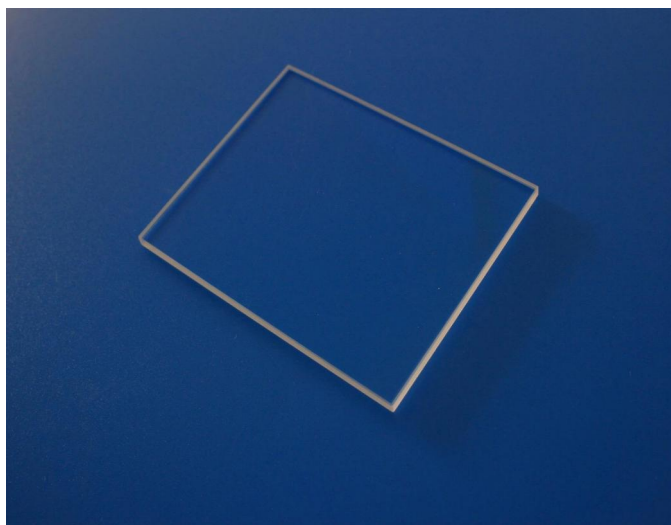

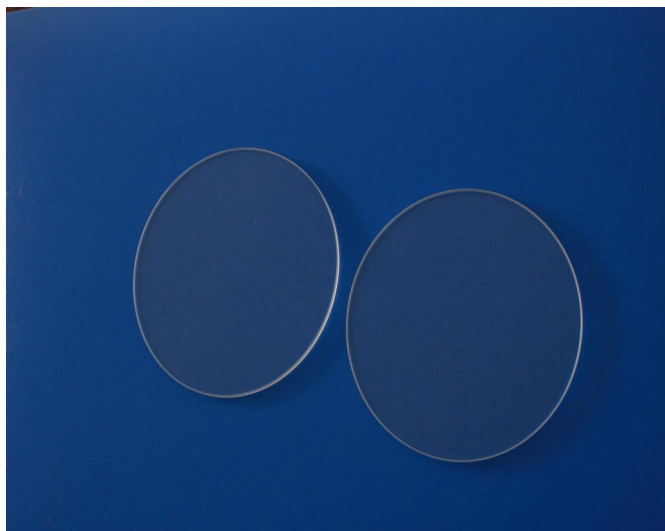

Product Description:

Optical windows are typically fabricated from two flat (or plano) polished surfaces that are optically transparent and intended to separate, seal, or otherwise protect other components. The double-sided manufacturing process yields exceptional parallel transmitted wavefront making it ideal for visible windows in industrial and biomedical applications, as well as IR windows in military/defense applications.

Custom Made Capabilities :

Material	H-K9L,H-K51,BK7,B270,D-ZK3,h-K51, L-BAL42,L-BAL35 or Other customize
Structure	Plano
Type	Optical window
Design Wavelength	400-700nm or Other customize
Surface Accuracy	PV<0,2μm
Clear Aperture	>90%
Centration	<5'
Surface Quality	60/40,40/20,20/10,10/5
Dimension Tolerance	+0.00/-0.1mm

Product Show :

Why choose us ?

1. Over 19 years professional manufacturer for optical components.
2. Our Own Engineer and R & D Team.
3. We offer you competitive factory wholesale price.
4. OEM & ODM are available.
5. We accept customized.
6. We will try all our best to offer you best service.
7. We will send you detail pictures of products before shipping.

FAQ :

Q1. How can I get sample from you?

A1. Just send us your requirements, then we will send samples accordingly.

Q2: Can I custom the products based on my requirement?

A2.Yes, we can custom the material, specifications and optical coating for your optical components as your requirement.

Q3. Are you a factory?

A3. Yes, we are a professional manufacturer of optical components.

Q4. What is the MOQ of your products?

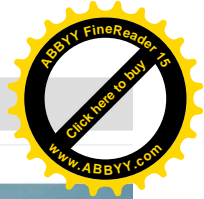

A4. No MOQ for customer if our product is in stock.
