

Laser Engraver Accessories

Laser Engraving Platform

Product size: 448mm*400mm*22mm

Box size: 460mm*120mm*138mm

Gross weight: 2.1KGS

Colour: Black

Material: Aluminium + Sheet metal

Heat dissipation method: Square notch type

Heat dissipation design

Excellent heat dissipation design to reduce edge carbonisation.

Protects the table

Prevents the laser from burning the table during the cutting process.

Accurate measurement

X and Y axis with high precision scales.

Clamp design

For fixing items and preventing engraving errors.

Ortur Enclosure

Product Size: 700mm*720mm*370mm

Box Size: 740mm*390mm*50mm

Gross weight body enclosure: 2.9KGS

Gross weight accessory enclosure: 0.7KGS

Colour: Black and grey reflective strip

Frame material: 6-series aluminium+fireproof and dustproof silicone glass fibre fabric

Body material: Body material Liquid silicone glass fibre

Zip material: Nylon

Frame material: 6063-T5

Smoke exhaust device

Exhaust fan with large air volume can discharge the odor and dust outside.

Extended functions

Fans and Lights, help you have better engraving and cutting experience.

Safety protection function

Fire retardant, waterproof, dustproof.

Security setting

Safety interlock device, magnetic control switch.

Laser Engraver Accessories

Foldable Feet

Box size: 190mm*145mm*55mm

Gross weight: 0.6KGS

Colour: Industrial grey

Compatible model: OLM-3

Height before unfolding: About 24mm

Height after unfolding: About 142mm

Frame material: ADC12

Customizable height

Foldable feet can make the placement of the machine suitable for various occasions, and can be freely adjusted to the height you want.

Widen the variety of projects

After installing the foldable feet, the machine can engrave and cut larger objects and materials.

High precision and stability

Aluminum alloy die casting, more exquisite and durable, tilting structure, engraving firmly.

Combination

The additional height of 188mm can better match the YRR engraving cylindrical material.

Ortur Air Pump

Box size: 280*192*127mm

Gross weight: 2.8KGS

Colour: Sprayed industrial grey

Compatible model: OLM-3

Material: Cold rolled carbon steel sheet

Working temperature: -10°C -38°C

Air output: 50L/min

Pressure: ≥ 0.003 mpa

Power: 25W

Cleaner engraving and cutting

There will be no powder residue left on the work.

Lightweight and strong material

Cold rolled carbon steel sheet, 2KG net weight.

Ensure smooth operation of the laser

The laser will be blocked by smoke and the power will be reduced, and the air pump can suppress the generation of smoke.

Prolong service life

The laser lens will accumulate dust when it is in the smoke for a long time, and it does not need to be cleaned manually with the air pump.

Laser Engraver Accessories

Y Axis Rotary Roller

Product size: 129mm*184mm*81mm

Gross weight: 1.2KGS

Motor: 42 Stepper Motor

Material: Aluminum, Acrylic, Plastic

Wide adjustment

7 gear positions for different diameters of cylinder objects.

Compatible with most engravers

Most kinds of desktop laser engravers are available.

Uniform velocity

Stable motor ensures even movement and no image shift.

High quality

Extra durable material allows a long lifespan.

Y Axis Rotary Chuck

Product size: 323mm*106mm*137mm

Gross weight: 2KGS

Box size: 385mm*170mm*120mm

Colour: Black + Silver

Material: Aluminium alloy, Stainless steel, ABS plastic

Support models: All Ortur laser engravers

Maximum angular speed: 360°/sec

Engraving diameter range Chucks: 1-120mm

Care of numerous shapes

Handle big or small objects with varied shapes.

Care of all angles

180°rotary, engrave objects from all angles.

Adjustment of 8 modes

8 modes for jaw adjustment, design for different materials.

Free from length limitation

Expand more possibilities for engraving long objects.
