DESCRIPTION

With a steel frame, the Baileigh PT-22 CNC plasma cutting table delivers a lot of value for its price. We include features that other brands consider upgrades, like **design software** and a **water bath**. Order this 2x2 plasma table for your application today!

- Runs on **110-volt power** and will work at almost any fabrication site in North America.
- **2' x 2'** (610 x 610mm) cutting area.
- **Comes fully assembled** with correct alignment. No need to spend hours building.
- Most other companies' plasma tables come in 5 or 6 boxes and cost about as much to ship as Baileigh's larger single box shipment.
- Includes **user-friendly programming software** (see more details below).
- You can **control the torch using the handheld panel** with a jog dial for the X and Y axes and program start and stop buttons.
- Durable, **high-quality stepper motors** drive the X-axis (single drive) and Y-axis (dual drive).
- All motor controllers and electronics are enclosed. **No loose wires to get in your way.**
- **Industrial cable track** on the X-axis ensures smooth cutting movement.
- 2 different torch-holders to accept both **automated torches and handheld torches.**
- Pre-cut **flat bar grates** support the material.
- **Fully-welded steel frame** will stay square for accurate cutting. By contrast, many competitors' aluminum tables will warp due to heat over time.
- **Small footprint** accommodates shops with limited space. You won't find many competitors that make machines this compact.
- **5" caster wheels** (2 stationary, 2 swiveling) let you move the table easily.
- **Water bath** with a ball valve drain collects dirt, debris, and smoke. It also keeps the table cool to prevent material from moving while being cut.
- **Cabinet in the base** with latched and hinged access doors.
- This small plasma cutter table is covered by a **1-year parts warranty.**

- **Lifetime technical support by phone** means that you can always count on troubleshooting and advice from an experienced Baileigh rep.
- **550 lbs.** shipping weight.

Plasma torch systems are sold separately. We'll let you choose the automatic or manual Thermal Dynamics Cutmaster model that works best for your application.

BOBCAD-CAM EXPRESS DESIGN SOFTWARE (INCLUDED)

The PT-22 comes standard with BobCAD-Cam Express programming software. You can design or **plot out your project on any computer** and load the plasma table via a USB drive. To learn more or download a free trial, click the BobCAD-Cam logo above.

Call us at **1-920-684-4990** with any questions you have about this 2x2 CNC plasma table.
