# Portable Handheld Fiber Laser Cleaning Machine

- Product Features

- 1.High power fiber laser
- 2.Non-contact cleaning, no damage to parts
- 3.Achieving different positions, size selective cleaning
- 4.No chemical agents, no consumables, safe and environmental protection
- 5.It's a small chassis design with small footprint, So it's convenient for transportation

## 6.High cleaning efficiency, good quality and time saving

- Applicable materials

It is mainly used for cleaning aluminum, iron, stainless steel, copper, steel and other metals of the same material, as well as aluminum copper, stainless steel copper and other materials mixed cleaning.

- Applicable industries

It is widely used in shipbuilding, automobile, high-end machine tools and rail industries.

- Sample show

✓ No damage to the mould base material

✓ High efficiency and cost savings

✓ High cleaning quality

✓ Green, no consumables

✓ Cleaning of the frame after welding

✓ Brake pad fresh back cleaning

✓ Selective removal

✓ No substrate damage

- Technical parameter

MODEL	TSQ-1000W	TSQ-1500W	TSQ-2000W
Rated output power	1000W	1500W	2000W
Max output power	1000W	1500W	2000W
Output fiber length	1070 ( ±10nm )		
Cleaning width	0-150mm		
Voltage	220V±20V	220V/380V±20V	380V±20V
Indicator light	Red Light		
Cooling method	Water cooling		
Max pressure	1.0Mpa		
Total power	5120W/5580W	7120W/7580W	8720W
Working model	Continuous/modulation		
Working environment	Flat, no vibration and shock		
Working humidity ( % )	< 70		
Operating temperature ( °C )	10-40°C		
Size	890mm*413mm*716mm		
Weight	120kg

22 Aug 2020

The machine is efficient and fast. I only use 7% - 10% power for most of the wood engraving. 30% for glass etching. Haven't tried it yet on colored metal and other materials. So far, this exceeds my expectations. Will buy a bigger one in the next few months. Customer support is excellent too. Video conference and remote assistance is what makes them a great supplier for clients in abroad like me.

👍 0

Very satisfied with the use of the results
