

Powermax85 SYNC plasma cutter

The Powermax85 SYNC™ is a next-generation professional grade air plasma cutter that dramatically simplifies system operation for cutting and gouging up to 25 mm (1"). Features automated system process set-up via advanced RFID-enabled SmartSYNC™ torches and a revolutionary single-piece cartridge consumable that provides trackable utilization data. The Powermax85 SYNC maximizes productivity through reductions in downtime, optimized cut quality performance and streamlined consumable inventory management.

Benefits

Easy to use

- Cartridges are easy to identify by process with clear laser marking and color coding to eliminate part mix-ups.
- RFID-enabled SmartSYNC™ torches and cartridges automatically set the correct amperage and operating mode, eliminating setup errors.
- End-of-life consumable detection eliminates the uncertainty of knowing when to change the cartridge.
- Less operator fatigue when using hand torches with our new flexible lead. The lead has the same robustness of our previous lead jacket material and will also be used on robotic torches.

Minimize operation costs

- Simplified system operation minimizes the time and costs spent on training and troubleshooting.
- Reductions to downtime during consumable change-outs and elimination of costs associated with premature disposal of consumable parts.
- Cartridge usage data provides valuable insights for improving cutting operations and consumable inventory management.

Maximize performance

- Tackle a wide range of jobs with easily interchangeable torch styles and application specific cartridges for various types of cutting and gouging.
- Optimized cartridge consumable design provides up to twice the life for handheld cutting and improved quality over life in mechanized setups compared to standard consumables.
- Time-saving hand torch controls allow the operator to adjust the amperage on the fly, change cartridges and applications without returning to the power supply.

Specifications

Cut capacity

Capacity	Thickness	Cut speed
Recommended	25 mm (1")	500 mm/min (20 ipm)
	32 mm (1-1/4")	250 mm/min (10 ipm)
Severance (hand cutting)	38 mm (1-1/2")	125 mm/min (5 ipm)
Pierce*	20 mm (3/4")	

*Pierce rating for handheld cutting, or mechanized cutting with programmable torch height control.

Maximum removal gouging

Capacity	Metal removal rate	Gouge profile
Typical gouge	8,2 kg (18.2 lbs.) per hour	3,5 mm D x 6,6 mm W (0.14" D x 0.26" W)

WHERE TO BUY

SmartSYNC torches (/hypertherm/powermax/smartsync/) feature RFID capability that when coupled with a Hypertherm cartridge will communicate with a Powermax SYNC system to automatically set the amperage and process on the power supply. Available in handheld, mechanized and robotic torch configurations.

Hypertherm cartridges

The Hypertherm cartridge consumable platform (/learn/consumables-and-torches-for-powermax-and-max-systems/hypertherm-cartridges/) is a revolutionary change to standard air plasma consumables. Each single-piece cartridge is optimized by process and amperage to ensure performance while dramatically simplifying the parts needed to cut or gouge with plasma.

Hypertherm cartridges for Powermax systems are manufactured to uphold our high standards for quality and reliability. As part of the manufacturing process, we test-fire each cartridge to ensure proper assembly and function. As a result, there may be burn marks on the tip of the cartridge. This is normal and not a sign of damage.
