## Extreme Pulse Control \& Tunability

Pulsar is a complete laser system enabling extreme pulse control and tunability, offering the user an unmatched level of versatility. With the independent adjustment of three key parameters: repetition rate ( MHz to single shot), pulse energy ( 10 nJ to 10 uJ ), and pulse width (300 to 600 fs ).

Pulsar is an ideal laser for nonlinear optics applications, especially two-photon and three-photon absorption spectroscopy and microscopy.
