Pulsed Fiber Laser Cleaning Machine for Rust Paint Removing

Rating :

laser cleaning machine is the new generation of safe, high efficiency, energy saving, environment-friendly metal laser cleaning equipment, using handheld swing cleaning head, touch screen and button control, combined with the advanced integrated control system, the precision CNC fiber laser cleaning machine is assembled. It meets the cleaning requirements of complex shapes and fine positioning in the industrial processing field, and achieves higher cleanliness cleaning effects and lower overall cost production benefits.

MORE

Main Feature:

1. Accurate laser cleaning for exact position and precise size.
2. Widely applied in flat, curved and three-dimensional surface for work piece of elastic material and plastic with very small and deep holes.
3. Flexible operation for work pieces with complicated geometric construction can be realized by mechanized or hand-held laser cleaning head.
4. No maintenance and no consumables, dust-free, no chemicals, no pollution.
5. Non-contact cleaning and no damage for substrate Extremely.
6. Low cleaning cost and High cleaning efficiency.

Machine Configurations:

Handtorch Scanning Cleaning Head
Light shape, economic deign, High speed

Fiber Laser source

Adopting famous brands (Raycus) the photoelectric conversion rate is greatly improved, laser power is enhanced, has better welding effect, can according to the needs of customers with different configurations to meet customer needs.

Industrial Water chiller

One of the biggest convenience of the machine is the inside water chiller. It saves a lot of the machine's dimension. It is constant temperature industrial type.

Machine Parameters:

Model	Unit	CS-200/300/500/1000W	 E-mail  WhatsApp   Wechat
Output working method		Pulse/continuous	
Voltage		220V- 50HZ / 60HZ 380V	
Output armor cable length	M	5	
Average output power	W	> 100	
Cleaning width	MM	1-20	
Laser Power	W	200/300/500/1000W	
Maximum power consumption	W	< 450	
Application		Surface Paint Cleaning	
Whether anti-high reflection		Yes	
Cleaning Materials		Metal Rust Oil Dust Coating	
range of working temperature	°C	0~40	
Storage temperature range	°C	-10~60	
Storage temperature range	°C	-10~60

Sample Display:

Machine Application:

Handheld laser cleaning machine uses high-frequency and high-energy laser pulses to irradiate the surface of the workpiece, so that the surface oil, rust or coating evaporates or peels instantly, and effectively removes the surface attachment or surface coating of the cleaning object at a high speed, so as to achieve the cleaning of the object. It is characterized by no damage to the part matrix, no consumables, energy saving and environmental protection.

How to Play Order:

1. Will you please inform us the below information?

What material will you clean? Rust, paint, oil?

2. We would like to recommend you suitable laser cleaning power 200w 300w 500w accordingly and offer you our best price.

3. Will you ship machine by sea, by air? So, please tell us your nearest sea port, air port. We would like to check freight fee for you.

4. After you confirm machine model, power, price, freight fee, then please inform us your **consignee information (company name, address, contact, phone number)** we will make **Proforma Invoice** for you to play order.

5. You can remit the payment according to Proforma Invoice.

6. Machine will be ready 10-12 working days after your payment.

7. We will share with you machine photos and videos since machine is ready.

8. After confirming all is fine, we will book shipment.

9. We will share with you bill of lading, commercial invoice, packing list after shipment.

10. You can operate laser welding machine according to user video and user manual.

11. If any questions about using, we would like to guide you online.
