Co2 Laser Engraving Cutting Machine Controller

RUIDA RDWorks Software

November 1, 2021 by ruidacnc

What is ruida RDWork Software?

RDWorks is a free program that allows you to carry out laser cutting and engraving processes with ease. RD Works is a design and drawing program which supports drawing points, lines horizontal and vertical, polyline, ellipse and circle, rectangular and square, Bezier curve, text, and formats for CAD models such as DXF, AI, and PLT. If you have a Chinese-made laser engraver then this is a good software package to use and fully supports the Ruida controller. Please contact us if you need any assistance or support.

RUIDA RDWorks is a software used to control laser cutting and engraving machines. It supports various laser cutting machines, including CO2 laser cutting machines and fiber laser cutting machines. RDWorks provides a user-friendly interface for setting up and controlling laser cutting projects, as well as advanced features like motion control, image processing, and job management.

What files support RDWorks?

The RDWork v8/LaserWorks v8 system supports the following formats: **Vector format: Dxf**, ai, plt, DST, dsb, and related formats. Bitmap format: BMP, jpg, gif, png, mng, and related formats. The RDWork v8/LaserWorks v8 application is required to run on Windows XP, Windows 7, Windows 8/8.1, and Windows 10.

RDWorks manual

RDWorks is a free laser cutting and engraving software that is compatible with many laser machines. The software provides a user-friendly interface for designing and controlling the laser-cutting process. Some features of RDWorks include support for vector and raster images, a variety of power and speed controls, the ability to preview the cutting path before sending the job to the laser machine, and support for multiple file formats. The software also includes a manual that provides detailed instructions on how to use the software effectively.

Rdworks Vs Lightburn

rdworks is dedicated software for the ruida co2 laser controller, and LightBurn is laser engraving and cutting software that supports multiple systems, not only the Ruida controller.
