## Suitcase Style Fiber Laser Cleaning Machine

- High efficiency.
- Simple interface operation.
- Hand-held design is easy to carry.
- Precise positioning cleaning.

### Description

#### Fiber Laser Cleaning Machine

##### Product Description

Fiber laser cleaning machine is an integrated system that offering a safe, fast, and non-contact method of eliminating oil, dust, rust, coating on surface of a material without causing damage to the surface of a material in an environmentally friendly way.

##### Product Advantages

1. Portable design: compact structure, wearable, ergonomic, single person operation.
2. High efficiency cleaning: laser cleaning has high efficiency and saves time.
3. Non contact: laser cleaning without grinding and non-contact.
4. No pollution: it can easily solve the environmental pollution caused by chemical cleaning without using any chemical agent and cleaning solution.

5. Strong expansibility: replaceable field mirror, changing focal depth, wider laser cleaning format.

### Luggage type pulsed laser cleaning machine

#### Product Details

**Laser source**  
stable, efficient,  
Basically maintenance free.  
Good experience and low cost.

**Cooling air inlet**  
Uniquely designed portable  
detachable dust net, better air  
intake, dustproof and dirt-proof,  
easy to disassemble and maintain.

### Controlling software

1. There are more than 20 mainstream languages to choose from.
2. Important parameters such as laser power, pulse width, and light output frequency can be adjusted.
3. Six cleaning shapes: solid circle, solid rectangle, hollow circle, hollow rectangle, ∞ shape, line shape.

### Hidden storage

The compact design maximizes the storage of accessories

### Touch screen

Touch screen, easy to operate, Can be configured with various Parameters and controls real-time laser.

### Handheld cleaning head

1. Field lenses of different sizes can be replaced, and a variety of cleaning areas can be selected.
2. The ultra-mini portable cleaning head weighs only 0.5KG.
3. Replaceable auto focus cleaning head integrated in automation.

### Product Parameters

## TECHNICAL PARAMETERS

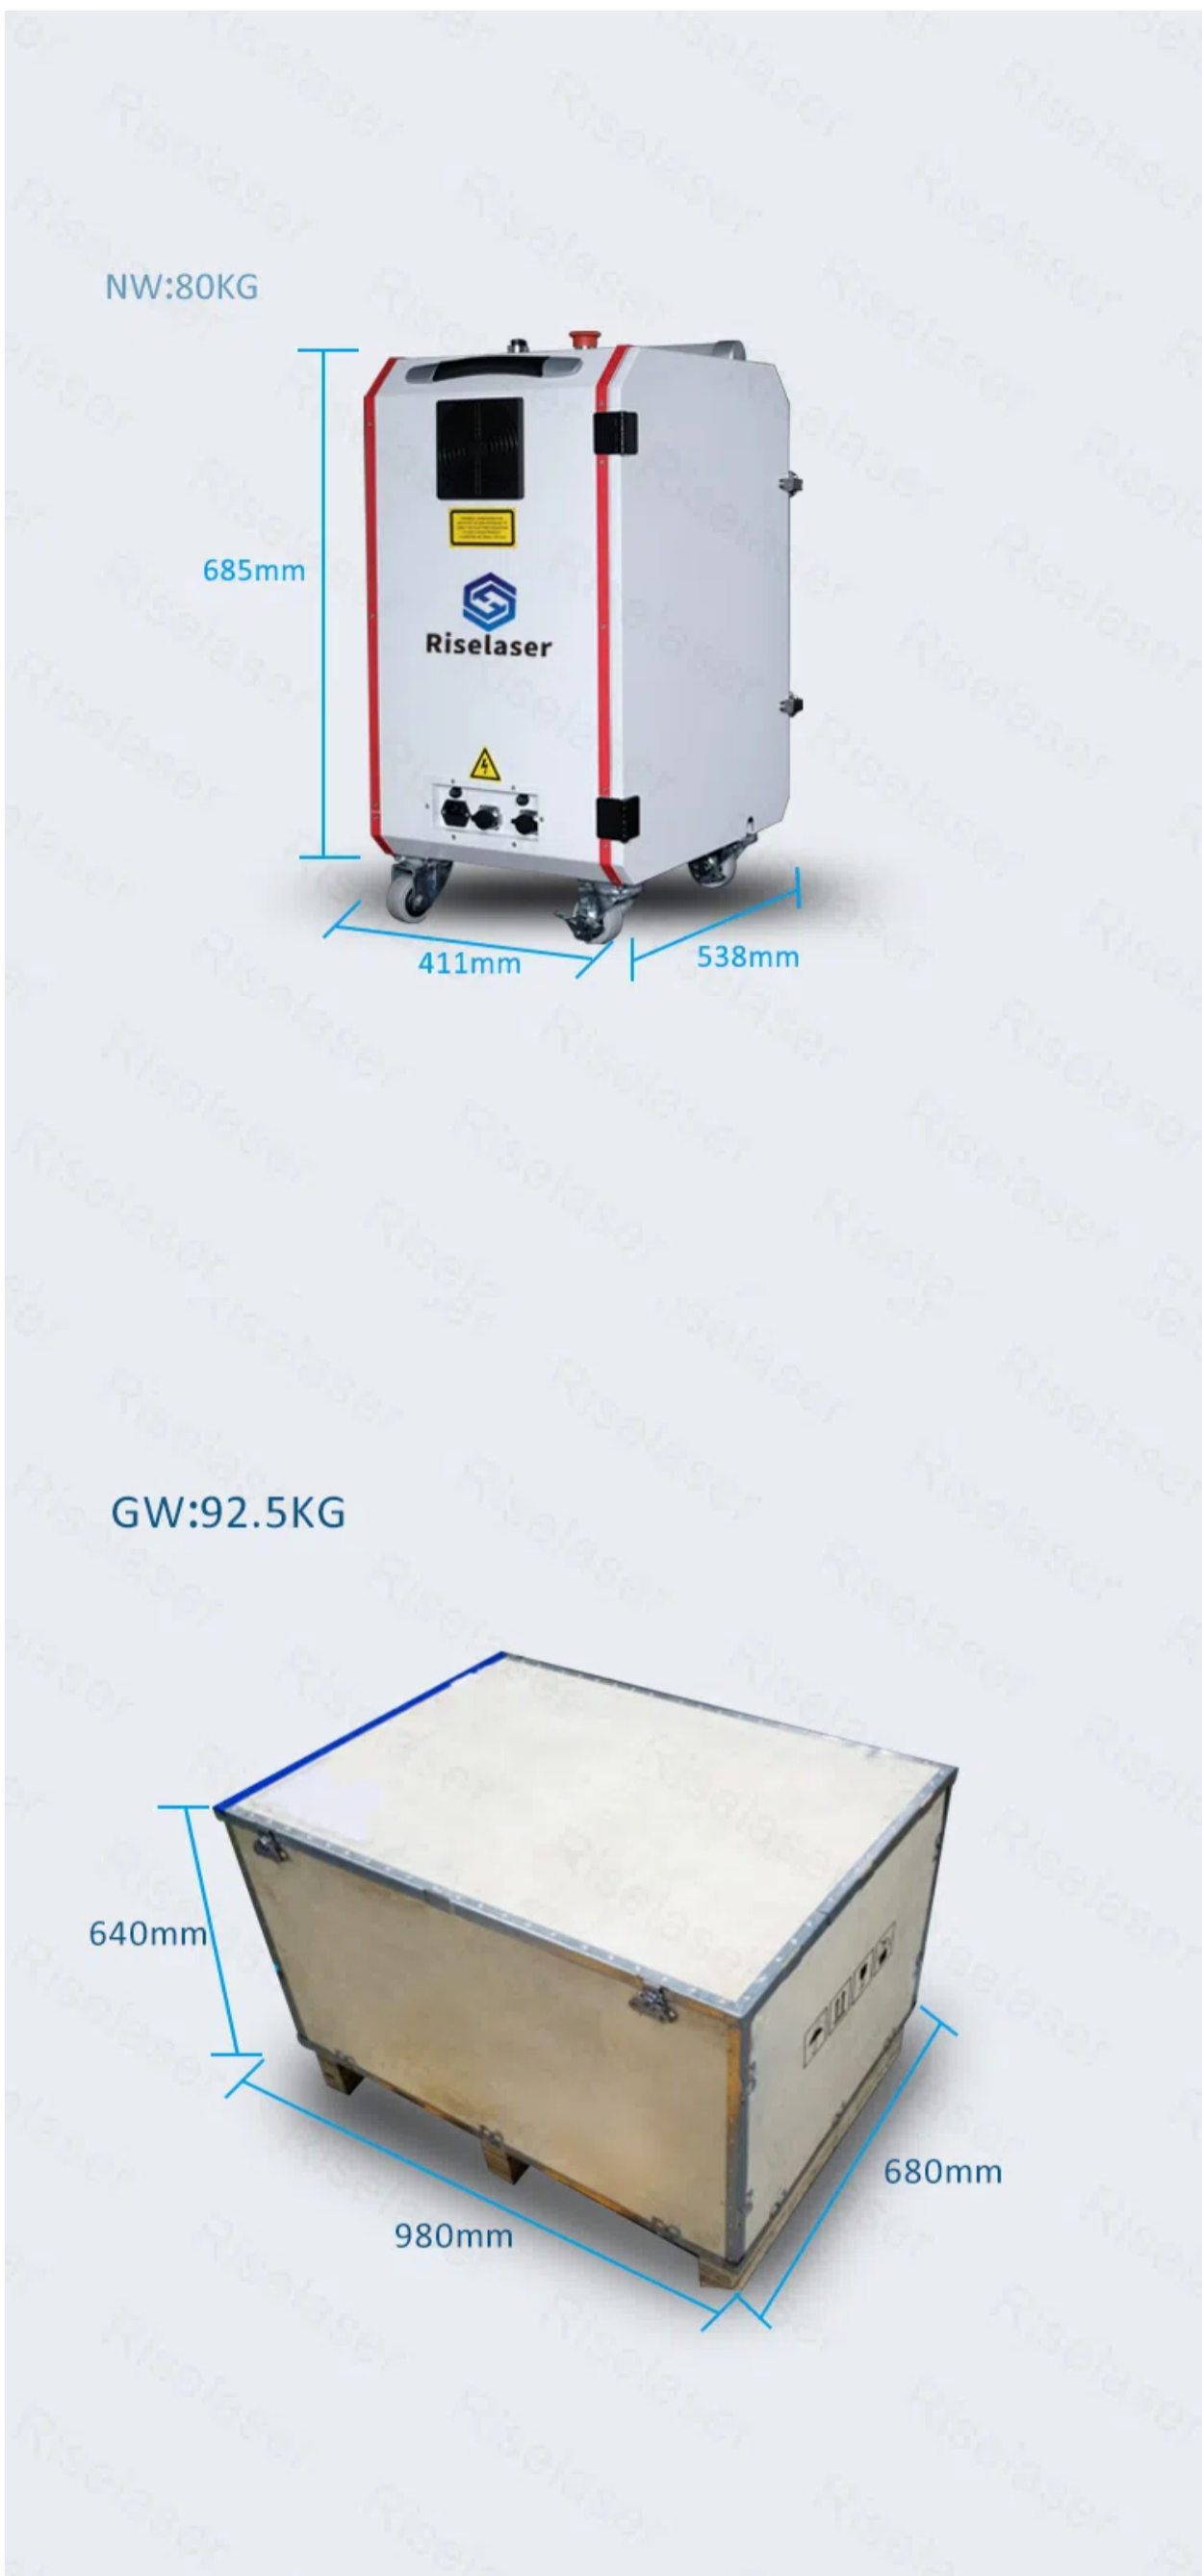

Max average power(W)	100	200
Output central wavelength(nm)	1064±5	1064±5
Beam quality(M <sup>2</sup> )	≤1.6	≤1.8
Power adjustment range(%)	10-100	10-100
Output power instability(%)	≤5	≤5
Pulse repetition rate(kHz)	20-400	20-2000
Pulse length(ns)	10/20/30/60/100/200/250/350 Optional	10/30/60/240 Optional
Max pulse energy(mJ)	1	1
Fibre length(m)	3	3/5
Laser safety classification	4	4
cooling method	Air-cooled	Air-cooled

### Sample Display

### Product Packaging

- 1.The whole fiber laser cleaning machine packing.
- 2.Anti-collision packing edge.
- 3.Fumigation-free plywood wooden box with iron binding belt.
- 4.International standard exporting wood case.

FAQ

Q: Can I get some discount if I order more ?

A: Yes. The more you order, the more you save.

Q: How long is your delivery time?

A: When the order is confirmed, 3 working days for the small order, 10~15 days for the bulk.

Q: Can you offer me OEM service?

A: Yes. However,you should give me more request as you can.

Q: How to choose suitable model?

A: Please provide a photo of the product you used before or advise us your needs, we will give suggestion .

Q: What's your fiber laser cleaning machine MOQ?

A: Normally one piece. If more, we can talk about discount. You can mix it with other laser machine parts shipping together.

Q: Why choose your company?

A: We are a professional Industrial Solutions company in China. We're more familiar with customer's marking or engraving applications. So we're in a position to recommend a more suitable model and provide free professional technology.

Q: What can you buy from us?

A: laser cutting machine, laser marking machine, laser engraving machine, laser welding machine , laser precision machining equipment, pulsed and continuous fiber lasers and laser equipment.

Q: Can I get a sample to check the quality ?

A: Yes, we are glad to offer you sample for test. And there is a discount for Trade Assurance Sample Order.

Q: How can we guarantee quality?

A: Always a pre-production sample before mass production. Always final Inspection before shipment.
