Product Details

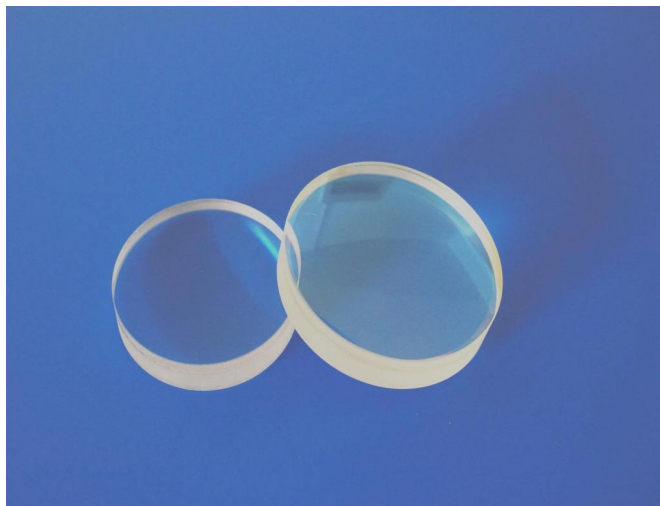

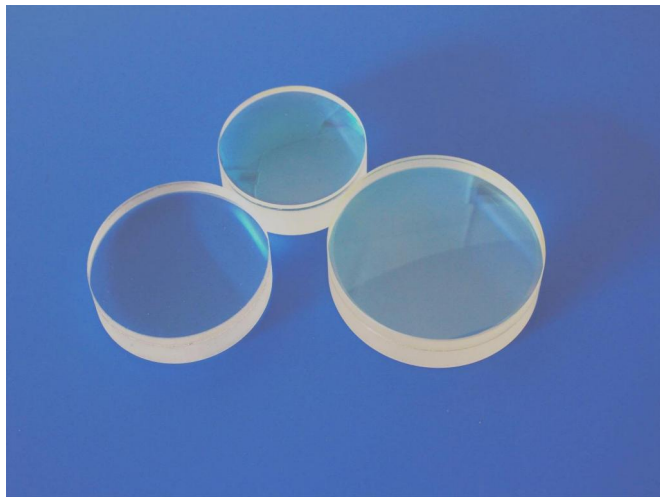

Product Description:

An achromatic lens is a lens that is designed to limit the effects of chromatic and spherical aberration, and is corrected to bring two wavelengths (typically red and blue) into focus in the same plane. The most common type of achromat is the achromatic doublet, the commonly used materials are composed of flint glass and crown glass.

Custom Made Capabilities :

Diameter	12.7mm
Thickness	5.0mm
Focal length:	50.0
Clear Aperture	>90%
Flatness	Lambda/2
Centering	< 3 arc min
Clear aperture:	>90%
Surface Quality	40-20
Bevel	0.25mmx45degree
Coating	Uncoated

Product Pictures:

Our advantages:

1. Professional team: We have an excellent team, continue to provide quality services.
2. Global market: Our products are applied in many fields, is currently sold in Southeast Asia, North America, Europe and c
- 3.OEM/ ODM: We can according to the different needs with customized services.
4. Service Department: We have a complete after-sales service system.

Packing and Delivery :

Packaging Details:

Inner packing-----special protective packing for optical products.

Outer packing-----carton, Shock absorption material and bubble wrap.

Delivery Time :7-21 days

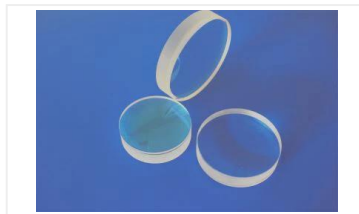

Delivery: Generally, we use the DHL, UPS etc. Please note it before delivery. Transit time depend on the express and dest the way, we would re-check all the details before delivery.
