Our flagship table, the 4x8 is our most popular size with fully motorized X,Y, and Z axes and a tough welded steel frame THC, collision detection torch mount for accuracy and repeatability. A laptop computer is an optional addition and comes with the necessary software pre-installed. If you do not require a computer with your machine, you will receive a flash drive with the necessary software for manual installation.

**All these features come standard:**

- Torch stand to Collision detection torch mount with height control
- Wiring harness to Automotive inspired modular wiring harness
- Gear driven to High precision planetary gear reduction
- 4'3" X axis by 8'3" Y axis
